**Subject: Additional information to register a new end-use product
STK-20; ABN: Regev, EPA File Symbol: 86182-XX
Tea Tree Oil Technical Data Matrix**

Dear Ms. Roe:

Wagner Regulatory Associates, Inc., as agent for Stockton (Israel) Ltd. (EPA Company Number 86182) is submitting additional information needed for the registration of the above referenced product containing the currently registered active ingredients tea tree oil (PC Code 28853) and difenoconazole (PC Code 128847).

On April 8, 2019, a data matrix for the product STK-20 was submitted for review and it contained product chemistry, acute toxicity, and ecotoxicity using STK-20 as the test material for all studies. The submitter understands that the ecotoxicity studies (MRIDs 50804617, 50804618, and 50804619) were not specifically requested by the agency. These studies were required for other jurisdictions and were submitted to the agency to assist in their review.

Also, the submitter does not qualify for the formulator's exemption for tea tree oil technical as was claimed in the Formulator's Exemption Statement. Therefore, Stockton (Israel) Ltd. is submitting an updated Formulator's Exemption Statement, claiming only difenoconazole, and a data matrix for the tea tree oil technical material.

In support of this request, enclosed are the following documents:

- Letter from Stockton (Israel) Ltd. appointing Wagner Regulatory Associates, Inc. as its agent
- Application for Pesticide Registration (8570-1)
- Certification with Respect to Citation of Data (8570-34)
- Data Matrix for tea tree oil technical, EPA internal and public (8570-35)
- Updated Formulators Exemption (8570-27)

Thank you in advance for your efforts in reviewing this submission. Please do not hesitate to contact me by email at rachel@wagnerreg.com or by phone at 302-635-7289 should you have any questions.

Respectfully submitted,

Rachel L Hardie
Agent
